

WIRELESS TELEPHONE COUPLER

Abstract of the Disclosure

A wireless telephone coupler for connecting a modem connected to a computer to a wireless telephone. In the preferred embodiments, the coupler includes an standard RJ-11 telephone jack for connection to the modem and a three conductor output receptacle adapted to be connected to the socket currently included in most cell phones and cordless phones for use with headsets to allow hands-free voice communication. In one preferred embodiment, a pair of amplifiers are coupled so that one of the amplifiers is coupled to transmit from the modem to one conductor of the socket and the other of the amplifier is connected to receive from the other of conductor and pass signals from the socket to the modem.
